DIRISHAM KAMESH

Computer Science Engineering Student | Software Engineering Intern Candidate

Visakhapatnam, Andhra Pradesh, India | kameshdirisham@gmail.com
github.com/DirishamKamesh | linkedin.com/in/dirishamkamesh

PROFESSIONAL SUMMARY

Computer Science Engineering student at Vignan, Duvvada, with project experience developing web applications for codebase exploration, student collaboration, faculty workflows, healthcare management, and task tracking. Familiar with C, C++, Java, Python, JavaScript, HTML, CSS, React, and Node.js, with ongoing practice in Data Structures and Algorithms. Seeking a software engineering internship to apply programming skills, build practical solutions, and strengthen problem-solving through hands-on work.

TECHNICAL SKILLS

Programming: C, C++, Java, Python, JavaScript, TypeScript
Frontend: HTML5, CSS3, React.js, Vite
Backend: Node.js, Express.js
Computer Science & Tools: Data Structures and Algorithms (DSA), AST parsing, Git, GitHub

TECHNICAL PROJECTS

RepoRiddle - Interactive Codebase Riddles | TypeScript, Node.js, Express.js Repository
- Built a GitHub codebase ingestion workflow with SHA-based caching, vendor-file filtering, and AST-based import-graph parsing.
- Created interactive engineering challenges that guide users through codebase investigation and verify solutions using pinned code evidence.

HackMate - Hackathon Collaboration & Skill-Matching Platform | JavaScript, HTML5, CSS3, Vite Repository
- Developed a student networking platform with role-compatibility scoring to help match hackathon teammates by skills and roles.
- Created interfaces for browsing project ideas, participating in community discussions, and forming teams.

CareSync - Smart Hospital Management System | JavaScript, HTML5, CSS3 Repository
- Designed role-specific interfaces for administrators, doctors, and patients to manage appointments and digital records.
- Implemented client-side prescription PDF generation with embedded QR codes to support digital-document verification.

FacuLynk - Faculty Workflow Support Portal | JavaScript, HTML5, CSS3, Node.js Repository
- Built a centralized web portal to organize faculty workflows, departmental scheduling, and academic communication.
- Developed structured UI views and backend services to organize faculty tasks and support coordination.

Tasky - Real-Time Task Management System | React.js, JavaScript, Vite Repository
- Built a responsive task-management application with modular React components, interactive state management, and real-time task tracking.
- Designed workflow dashboards for organizing priorities, categorizing tasks, and tracking project milestones.

EDUCATION

Vignan - Duvvada, Andhra Pradesh, India
Computer Science Engineering Student

CERTIFICATION

PGDCA (Post Graduate Diploma in Computer Applications)
Coursework: C, C++, Java, Python, and Microsoft Office

ACHIEVEMENTS

Participated in five hackathons, gaining experience in collaborative problem-solving and project development.
